I'm drafting up the first of the required annual reports that we need to submit to the CCC. The report will include all the data. You could probably get it from their web site after it is submitted.

2014 pups: On March 12 I counted 52 pups nursing on CPB. A half hour later I counted 13 pups in the alcove on Pt Loma (since the powers that be say Pt Loma is not a rookery the pups must therefore have been born at the Children's Pool.) There were two pups born after March 12. There were 8 still births and 1 abandoned pup rescued on the Cove beach.  $52+13+2+8+1=76$  That's the number I'm using. It was hard to keep track but somewhere around 30 of the 76 were born on South Casa.

Then I am sure they would be OK with releasing the notes and data for this season too. 12/2013 to present.  
It could be considered just a continuation of the original California Public Records Act request.

And last year you were good enough to share the total number of pups born at the CP and other beaches.

John,  
Yes, that is my handwriting. All the data you received went through the CAO first. They were OK with it being released to you.

I inquired as to what data was being collected to satisfy the Coastal Commission request for research data you would carry out.

This was one of the pages that you must have designed and gotten filled out.

Is that your writing? These things really should have signatures since they are official research and possibly accusations of crimes.

Be of good cheer.
